## ABOUT ME

---

I am a results-oriented professional with the ability to work in teams and communicate effectively. Additionally, I am committed to continuous learning. I am currently seeking a new job experience as a Developer where I can apply my skills acquired building Full Stack applications with Javascript, React and Node.

## EXPERIENCE

---

**Full Stack Developer**  
*uTriper*

*Colombia*  
*2024-Present*

- Migrated and optimized the checkout flow for multiple products using React.js, Material UI, and Node.js. Improved flexibility by enabling tour operators to create pending bookings with editable prices, quantities, and other parameters. Currently, 18% of all bookings are created with pending status.
- Developed new contract features between tour operators and hostels, including custom markups and discounts. Also enabled hostels to categorize their tour offerings for better organization and visibility.
- Authored documentation of critical product features—such as the booking status lifecycle, contracts, and more—using Docusaurus, to support onboarding of new engineers and cross-team collaboration.

**Frontend Developer**  
*LinkUs*

*Belgium*  
*2022-2024*

- Led the migration of the legacy platform to Next.js and Tailwind. Collaborated with product and UX teams to create a multilingual, mobile-first web app used across European Markets.
- Used performance techniques like server side rendering, static site generation and lazy loading to improve performance on crucial pages of the website, making first load > 40% faster. Worked with caching tools to avoid unnecessary API calls.

## SKILLS

---

**Skills:** Javascript, React, NextJS, NodeJS, SQL, MongoDB, Figma

## PROJECTS

---

**TesloStore**

2022

E-commerce replica of the official Tesla merchandise site, built with TypeScript and core Next.js features including SSG, SSR, ISR, and CSR.

**GabiGPT**

2024

AI assistant powered by the OpenAI API. Includes wide range of capabilities including image generation, text-to-speech, speech-to-text, and translation. Built with a React frontend and a Node.js backend.

**Flexrent**

2025

UX/UI Design project, Flexrent consists of an Airbnb clone using UX principles and advanced Figma utilities to bring the best possible user experience. Designed for mobile and desktop.

## EDUCATION

---

**UTN (Universidad Tecnológica Nacional), Argentina**  
*UX Design & Development*

2024

**Henry Bootcamp, Argentina**  
*Full Stack Web Development*

2022
